

Barnsley Safeguarding Adults Board (BSAB). *Performance Management and Quality Assurance* sub group Report – December 2018

The aim of the Performance Management and Quality Assurance Subgroup is to support Barnsley Safeguarding Adults Board (BSAB) work by looking at local, regional and national data/information to see how well we are keeping people safe, by comparing Barnsley with other Local Authorities across England.

Date of last meeting 17 December 2018

What's working well?

- ✓ All of the organisations who come to the Barnsley Safeguarding Adults Board meetings, give us information every three months to tell us what they have done to keep adults safe .
- ✓ We do regular audits to make sure that organisations and workers involved in keeping people safe are doing it well? If we need to improve things we share that with the Board and the other sub groups and set time scales for these actions to be completed

What we are thinking about?

Looking at the quality of care providers in Barnsley and helping them to offer the best possible care

Making sure that we are working on the key issues by getting feedback from customer groups

What action has been taken?

We have updated the dashboard to make sure all organisations give us information about reducing fire risks, making sure they employ safely and that they can deal quickly with staff or volunteers who harm adults.

Next Steps

We will look to work with the Children's Safeguarding Board to support young people to be safe as they move into adulthood
