

BARNSELY JOINT STRATEGIC NEEDS ASSESSMENT (JSNA)

Chapter (Integrated Care Outcomes Framework Domain): RESILIENCE AND EMOTIONAL WELLBEING

Theme: DRUG RELATED MENTAL AND BEHAVIOURAL DISORDERS

ICOF Indicator: HOSPITAL ADMISSIONS WHERE THERE WAS A PRIMARY DIAGNOSIS OF DRUG RELATED MENTAL AND BEHAVIOURAL DISORDERS

Why is this important?:

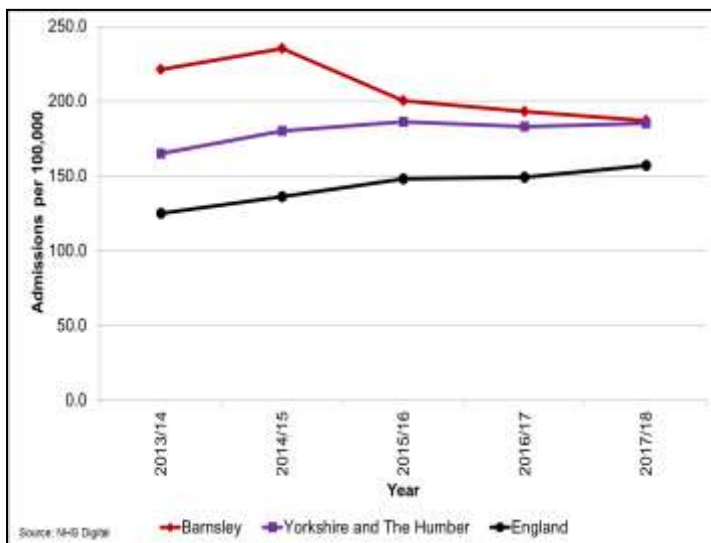

Mental health problems are common among those needing treatment for substance misuse and substance misuse is common among those with a mental health problem. Every year drug misuse costs the NHS in England £488million and it is estimated the wider cost to society is £15.4billion.

Investing in drug treatment cuts crime and saves money. Every £1 spent on drug treatment saves £2.50 in costs to society and treatment already saves an estimated £960million costs to the public, businesses, criminal justice and the NHS.

Drug-related admissions can be reduced through local interventions to reduce substance misuse and harm.

The Barnsley picture and how we compare:

Trend data: Barnsley, Yorkshire and The Humber and England (2013/14 to 2017/18)

Period	Number of admissions (Barnsley)	Admissions per 100,000 population		
		Barnsley	Yorkshire and The Humber	England
2013/14	500	221	165	125
2014/15	535	235	180	136
2015/16	455	200	186	148
2016/17	445	193	183	149
2017/18	435	187	185	157

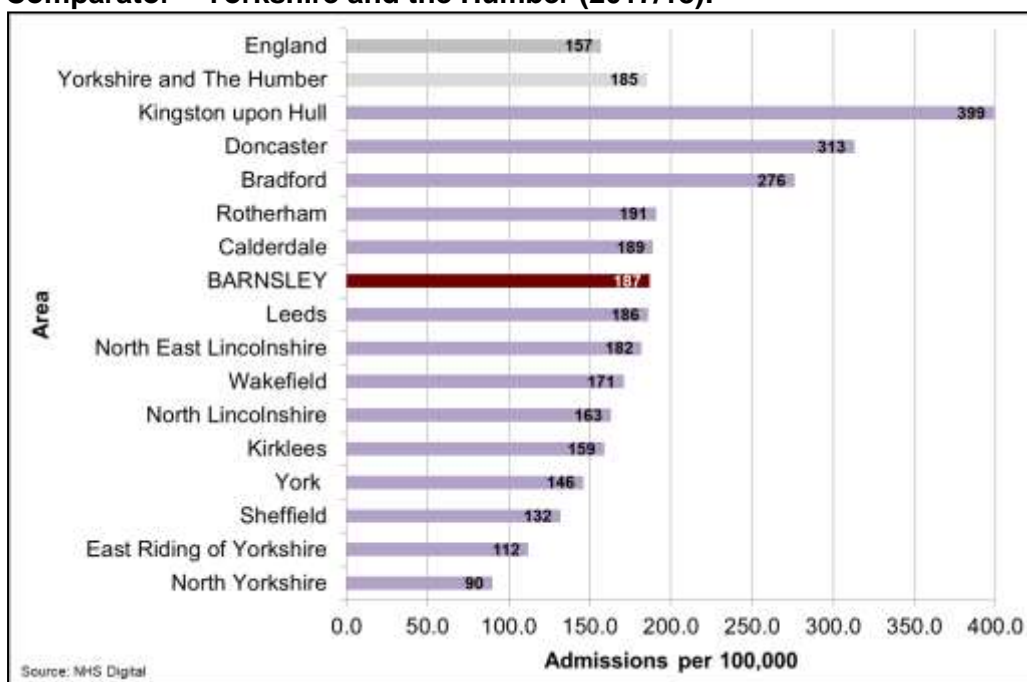

Source: NHS England

Definition:

NHS hospital finished admission episodes with a primary or secondary diagnosis of drug related mental health and behavioural disorders, by region and Local Authority, England, 2013/14 to 2016/17. A finished admission episode is the first period of in-patient care under one consultant within one healthcare provider. Admissions do not represent the number of in-patients, as a person may have more than one admission within the year.

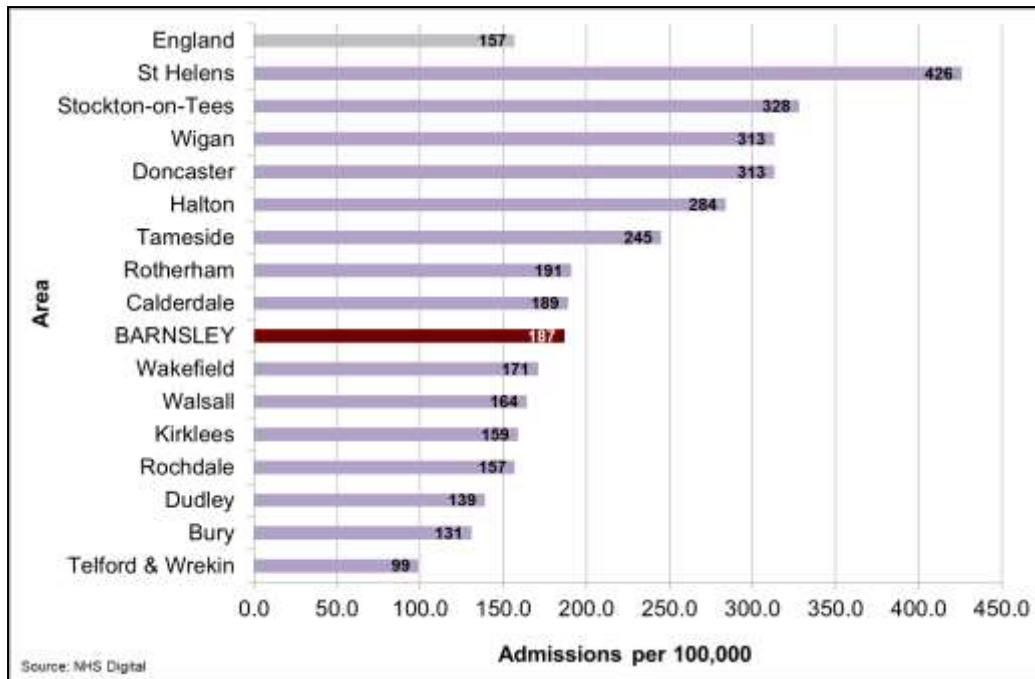

Barnsley's current rate (2017/18) for hospital admissions where drug related mental and behavioural disorders were a factor (187 per 100,000) is higher than the England average of 157 per 100,000. In terms of numbers, the rate of 187 per 100,000 represents 435 hospital admissions for Barnsley residents during 2017/18 for drug related mental and behavioural disorders.

Comparator – Yorkshire and the Humber (2017/18):

When compared to other local authorities within the Yorkshire and The Humber region, Barnsley is ranked 6th highest out of 15.

Comparator – ‘Nearest Neighbours’ (2017/18):

When compared to 'similar' local authorities, Barnsley is ranked 9th out of 16 (where 1 is the highest rate).
