## NHS HEALTH CHECKS

## ANALYSIS OF HEALTH CHECKS DELIVERED TO BARNSLEY RESIDENTS IN 2018/19

## Key Points

- 3,693 NHS Health Checks were delivered by Hallcross Medical Services Ltd in 2018/19, of which 3,621 could be allocated to a Barnsley postcode.
- Uptake rates were higher in the most deprived areas of Barnsley for both males and females (see slide 3).
- Of the 3,621 checks allocated to a Barnsley postcode:
- 532 (14.7\%) were current smokers (within Barnsley, rates were higher in the more deprived areas) see slide 4.
- More than a quarter (26.3\%) had a CVD risk higher than 10\% (within Barnsley, the lowest rate was in the second least deprived quintile) - see slide 5 .
- Almost a quarter ( $24.0 \%$ ) had high blood pressure (within Barnsley, the lowest rate was in the most deprived quintile) - see slide $\underline{6}$.
- More than 7 out of $10(71.2 \%)$ were an excess weight (within Barnsley, the lowest rate was in the least deprived quintile) - see slide $\underline{7}$.
- Almost a quarter ( $24.3 \%$ ) had a high cholesterol ratio (=>4.5) (within Barnsley, the lowest rate was in the least deprived quintile) - see slide 8 .
- Almost 7 out of 10 ( $69.3 \%$ ) were classified as active (within Barnsley, the lowest rate was in the most deprived quintile) - see slide $\underline{9}$
- More than a third (37.0\%) were either advised to reduce their alcohol intake, or were drinking over the recommended limit on a weekly basis (within Barnsley, the highest rate was in the second least deprived quintile) - see slide 10.

See slide 11 for numbers, percentages and lower and upper $95 \%$ confidence intervals for all the above indicators

## Uptake Rates by gender and deprivation decile

## MALES

FEMALES

## Current Smokers by deprivation quintile

## CVD Risk more than 10\% by deprivation quintile

## High Blood Pressure by deprivation quintile

## Excess Weight by deprivation quintile

## High Cholesterol Ratio by deprivation quintile

## Physical Activity by and deprivation quintile

## Alcohol Consumption by deprivation quintile

## ALL INDICATORS BY DEPRIVATION QUINTILE: NUMBERS, PERCENTAGES AND LOWER AND UPPER 95\% CONFIDENCE INTERVALS
