Introduction and Purpose

Barnsley Council is continuing to change how we work together for a 'Better Barnsley'. We have ambitious plans to improve and grow as identified in our Corporate Plan for 2017-2020. This sets out what we aim to achieve over the next three years to improve outcomes for our customers and the community as we strive to become more customer focused, modern, efficient and business minded.

We're still focused on achieving our three key priorities:

- Thriving and vibrant economy
- People achieving their potential
- Strong and resilient communities

We still feel that these areas warrant greater attention, emphasis, and possibly resources, to influence other areas of activity and make the greatest impact overall.

The council will concentrate resources to make the most impact by providing services where they are most needed and we'll help people to do more for each other and their community. To do this, we need a solid evidence base to develop effective interventions which will help to achieve a 'Better Barnsley'. Our Borough Profile provides content intended to support effective strategic and local decision making for the future and identify commissioning needs by stimulating discussion, debate and action to enable us to focus on those improvements that will make the most difference to quality of life in Barnsley.

The data within this report are from the latest available as of May 2018. It compares the Area Council with Barnsley and that of England where possible.

This information is intended to support Area Councils to identify some of their strategic priorities and commission services to meet these challenges.

Demographics

Overall Population

23,237

Up **3.5%** since 2011

Barnsley's population has been growing constantly since 2001. Since the 2011 Census, the resident population of the Dearne has increased by 3.5%, whereas across Barnsley there was a 4.9% increase. These increases were mainly due to more births than deaths and international migration.

Age Profile and % of Total Population

The age profile of the population is changing both locally and nationally due to the rising number of people aged 65+ years. The resident population of the Dearne consists of more young people (under 19 years), a similar proportion of those of working age and slightly fewer people of pensionable age when compared to Barnsley and nationally.
