

# Asthma Policy Flowchart

New child who has asthma or existing child is diagnosed with asthma.

Ensure Parent Carer Contract is in place and parents have signed the asthma section.

Establish whether the asthma is...

**Uncontrolled**

(severe, regular contact with asthma nurse, regular attacks, hospitalisation)

**Controlled**

(regular medication, as and when medication)

**Uncontrolled asthma**

Bespoke asthma care plan required, written together with a health care professional (usually asthma nurse) working with the child and parents prior to child starting.

**Controlled asthma**

Regular/ as and when medication

Generic asthma management care plan to be put in place by setting manager, which has been discussed and signed by parents.

Bespoke and generic care plans should be readily accessible but hold confidential information therefore identities should be protected when displayed.
