

BARNSLEY JOINT STRATEGIC NEEDS ASSESSMENT (JSNA)

Chapter (Integrated Care Outcomes Framework Domain): HIGH QUALITY COORDINATED CARE

Theme:

SERVICES RATED AS HIGH QUALITY: PRIMARY CARE

ICOF Indicator:

PROVISION OF HIGH QUALITY CARE: PRIMARY CARE (Barnsley)

Why is this important?:

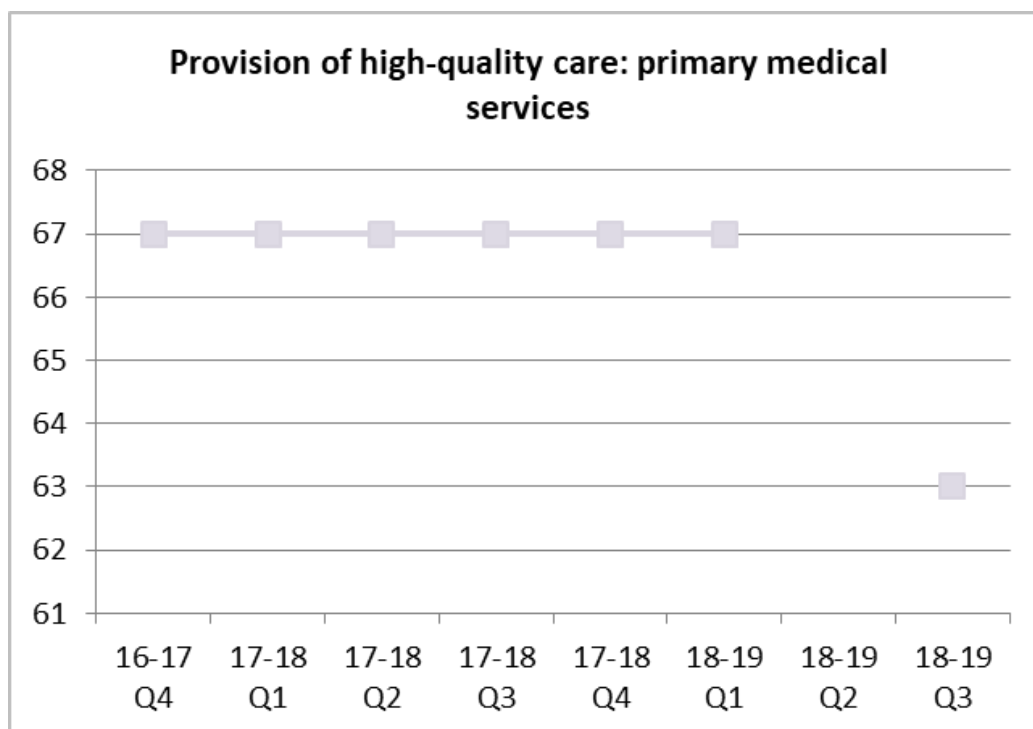

This metric provides an overall score indicative of the quality of care in a CCG area as determined by Care Quality Commission (CQC) inspection ratings. The summary score by sector (Hospitals, General Practices and Adult Social Care) for each area allows CCGs to assess the quality of care in their area against an England average and provides a baseline to monitor improvements.

The indicator is based on the ratings for each of CQC's five key questions: Is it safe? Is it effective? Is it caring? Is it responsive? Is it well-led?

The ratings are scored as follows: outstanding = 3, good = 2, requires improvement = 1, inadequate = 0.

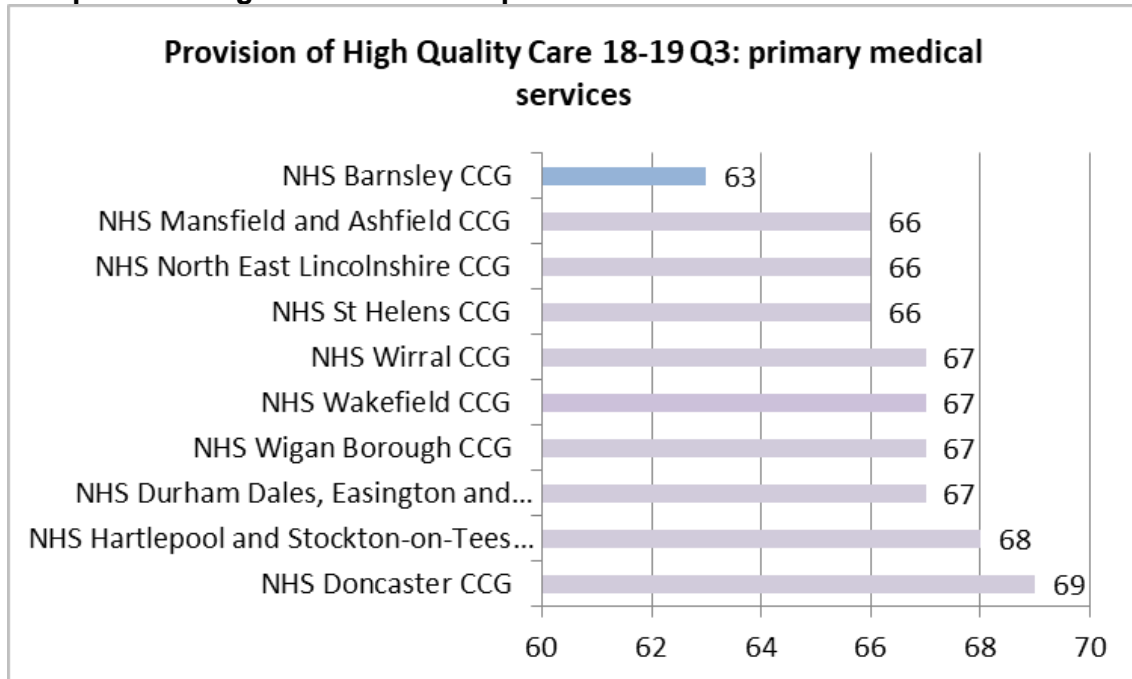

The Barnsley picture and how we compare:

Trend data: England and Barnsley (Q4 2016/17 to Q3 2018/19)

Published data for quarter 3 2018/19 shows that Barnsley's rating for provision of high quality primary care services has declined slightly recently.

Comparator – Right Care CCG Comparators:

Out of 10 comparator CCGs, Barnsley has the lowest rating.
