Barnsley has the lowest percentage of GP patients diagnosed with osteoporosis (0.08) when compared to other comparable CCG’s (see Figure 1.). This rate is also lower than England (0.17).

Figure 2. Prevalence of osteoporosis in GP populations by GP practice in Barnsley 2014-2015

- 10 GP practices did not provide data.
- 16 out of 26 practices had higher prevalence of osteoporosis than Barnsley (0.08).
• Barnsley has the lowest percentage of rheumatoid arthritis (0.76) when compared to comparable CCG’s (see Figure 3.), however this rate is higher than England (0.73).

Figure 4. Prevalence of rheumatoid arthritis in GP populations for Barnsley GP practices 2014-2015

• 16 out of 26 GP practices had higher prevalence rates of rheumatoid arthritis than Barnsley (see Figure 4.).
